

Introduction

Your innovations—**EthiCore**, a portable low-power device harvesting energy from Ethical Constraint Field gradients, and **ZeroCore**, a fixed high-power system extracting zero-point energy via resonance cavities—are underpinned by the SYMMETRIA theory's novel field framework. To secure support, funding and regulatory alignment, you need a clear, staged outreach plan spanning local representation, research bodies, regulators, policymakers and industry partners.

Priority Contacts

1. David Baines MP's Office (St Helens North)

2. *Rationale:* A constituency introduction ensures ministerial attention through your local MP's trusted channels.

3. Liz Kendall MP

4. *Rationale:* Chair of the APPG on Science & Technology in Health, with strong interest in promoting pioneering energy technologies and their societal benefits.

5. Innovate UK (National Office)

6. *Rationale:* Oversees core innovation funding programmes; a successful application will validate your device concepts and unlock government grants.

7. Innovate UK EDGE (North West Hub)

8. *Rationale:* Regional support for proof-of-concept trials, leveraging proximity to Daresbury Laboratory for EthiCore demonstrations.

9. Head of Ofgem Innovation Link

10. *Rationale:* To evaluate ZeroCore's grid-integration, resonance cavity safety protocols and regulatory compliance for high-power deployment.

11. BEIS Director of Net Zero Innovation

12. *Rationale:* Coordinates national R&D calls; aligns ZeroCore with hydrogen, CCUS and smart-grid initiatives, and ensures EthiCore meets sustainability policy tests.

13. Department for Science, Innovation & Technology (DSIT)

14. *Rationale:* Oversees cross-sector technology missions, including energy innovation programmes and regulatory modernisation.

15. UK Atomic Energy Authority (UKAEA)

16. *Rationale:* To explore advanced materials and superconducting resonance cavity expertise critical for ZeroCore's high-Q modules.

17. Parliamentary Office of Science & Technology (POST)

18. *Rationale:* Commission impartial briefings on SYMMETRIA's field mechanisms to inform evidence-based policymaking.

19. All-Party Parliamentary Group on Renewable Energy

- *Rationale:* To secure cross-party support for pioneering clean-energy technologies like EthiCore and ZeroCore.

20. Government Chief Scientific Adviser (GCSA)

- *Rationale:* Dame Angela McLean can guide on robust field-testing protocols and connect you with research councils.

21. Permanent Secretary, Department for Energy Security & Net Zero

- *Rationale:* Clare Moriarty can arrange a formal briefing for Ed Miliband once external endorsements and pilot data are in place.

22. Director of BP Ventures

- *Rationale:* Leon Pouy can facilitate industrial-scale trials of ZeroCore and strategic partnerships for EthiCore in remote-power applications.

23. CEO of Energy UK

- *Rationale:* Emma Pinchbeck can help onboard energy suppliers and network operators for integrated ZeroCore demonstrations.

24. Head, Alan Turing Institute Energy Programme

- *Rationale:* Professor Adrian Smith's endorsement will validate SYMMETRIA-based control systems in both devices.

Summary

This engagement plan positions EthiCore and ZeroCore through a sequence of strategic contacts: starting with your local MP for an initial introduction, moving through funding bodies (Innovate UK), regulators (Ofgem, BEIS, DSIT), expert research organisations (UKAEA, POST) and culminating in industry and ministerial briefings. Each step builds the case—technical proof points, pilot data and policy alignment—maximising the chances of funding, demonstration and official endorsement of your SYMMETRIA-based energy solutions.
